

**Art. 011812 STRONG-TRACK ROPE CLIMB**

Measures: 680 x 325 h 550

Outdoor equipment for the practice of the O.C.R. (Obstacle Course Racing) and BOOT CAMP, made from coniferous wood which has been treated through a deep injection of atoxic salts to withstand the wear and the hardest weather conditions for a long time. **Ascent on two 550 cm high ropes.**

This multifunctional tool is also a station of the complete track called **STRONG TRACK** that has been designed together with the associations which organize sport events and camps. The equipment is suitable also for the **Obstacle Races** called **Strong Man, Spartan Race, Warriors Run, X-Trail, Force Run** and similar.

The one represented is the standard shape. On demand, we can customize it according to the requirements of the track.

*Made from wood, the most recyclable and the most renewable material, which is worked only through the use of energy which comes from renewable sources. The structure will be fixed in the ground through the insertion of posts inside concrete blocks. Galvanized steel connecting brackets are also available.*
